

## Release Notes - Sep 10, 2020

---

### Features

#### Datum grid, Shift grid, Snake grid support

WorksManager now supports datum grids (.dgm), shift grids (.sgf), and snake grids (.dat) with this release [in addition to the geoid grid (.ggf)]

With this feature, WorksManager user can

- Add these grid files in step 2 - 'Configuration Files' of the 'Create New Project' workflow (*note that 'Geoid' label has been replaced with 'Geo Data'*)
- Navigate to 'Project Settings' for a project that has been already created in WorksManager and add/ edit/ remove from the 'Configuration Files' section anytime later
- Download grid files as a zip from 'Settings' screen or download a specific design along with the grid files from 'Design' screen

Please read through the [FAQ section](#) for more clarifications.

#### Civil Construction Software Communities and Resource Centers

[Here](#) you can find links to [WorksManager](#) and other Trimble Community resources.

Please refer to the COMING SOON TO WORKSMANAGER section on the [WorksManager Community](#) page to see what we are working on.
