Install Quadri Connector for Tekla Structures

CONNECTED CONSTRUCTION

Trimble.

Install Quadri Connector for Tekla Structures

To install the connector do the following:

1) Unpack the zip file and run (double click on) the contained TSEP-file.

2) A dialog opens showing the installed Tekla Structures (TS) versions on your machine.

3) Choose the wanted TS version(s) to use with the connector, close the dialog and start/restart TS.

4) The Quadri Connector will then be available in the Applications & components view inside TS. You find the connector by searching for the Quadri Connector in the search field in the Applications & components view e.g.. Double click on the connector symbol to start the connector.
