

Trimble Identity Region Selection Workflows

Last Updated July 2022

Notes

The following workflows are a subset of the overall workflows. Full Figma designs are being worked on by the UX Lead and Product Manager for TID.

The following workflows are subject to change.

Multi-Factor Authentication

Keep your Trimble ID secure by adding an extra layer of protection. When you have MFA enabled, you'll be asked to input a security code from any of the methods below to sign in.

- ✓ **Authenticator App (Default)** Remove
Your authenticator app has been connected.
- ✓ **SMS Phone Number** Remove
Get a code through SMS.

Account Recovery

We recommend having a backup email in case you need to recover your account.

Data & Privacy

Data Region

Your data region is the geographical location where Trimble stores and processes your personal information.

Data Region

United States

[Change data region](#)

Note: Your personal information is stored separately from your product data. Changing your data region will not affect any active product subscriptions or existing stored product data.
